

OVERALL SUMMARY OF TESTING

TEST OBJECTIVE:

1. Adding a Card in a Board and check the functionality in the Web Application for the following

- Members
- Labels
- Checklist
- Dates
- Attachments
- Cover

2. Testing List Actions for Web applications such as

- Add Card
- Copy List
- Move List
- Watch

APPLICATION OVERVIEW:

Trello is the easy, free, flexible, and visual way to manage your projects and organize anything, trusted by millions of people from all over the world.

TESTING SCOPE:

We will use this board to:

- Each one will add their own SMART tasks with due dates
- The tasks that we are unable to complete - each member will move to the next sprint
- We will use this board to review tasks

In-Scope: Functional Testing Scope of Testing

- Board
- Cards
- List

TESTING APPROACH:

➤ Functional Testing:

Functional testing is the process through which QA's determine if a piece of software is acting in accordance with pre-determined requirements

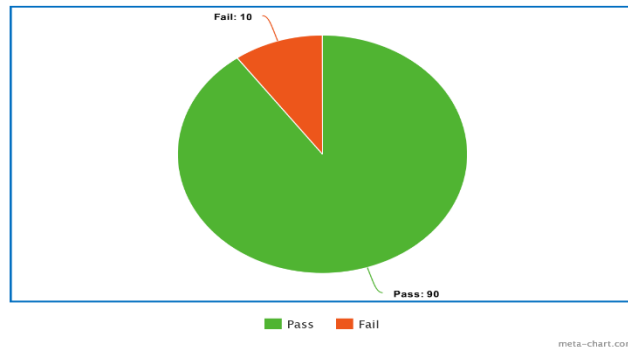

➤ User Interface Testing

UI Testing, also known as GUI Testing is basically a mechanism meant to test the aspects of any software that a user will come into contact with.
